Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention.

The applicants should add an --A-- before clinker in claim 1 and the term "The" in the preamble for all dependent claims. An A should precede the term process so the claims 14 and upwards include A process...

The term "clinker-type" is indefinite. The use of type is indefinite.

The term "magnesian" would appear to be improper from translation and should be magnesia or magnesium depending upon what applicants materially is for their invention.

The terms "quasi-free" are indefinite in claim 5.

The terms is "complemented by" is not clear. Do applicants mean further comprising? See claim 11.

The applicants claims 11 through 13 are indefinite because the applicants are claiming a non-statutory class of invention. Use of is not proper. It must be a method of using to be proper.

The term "preferentially" in claim 11, and "preferably" in claims 12, 13, and 17 is indefinite. The term "advantageously" is also indefinite in claim 17.

Claims 9, 10, 13, 14, and 16 through 20 are all indefinite because they are multiple dependent claims referring to another multiple dependent claim which is not permissible.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 102(a and b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kunbargi '556, '684, '534 B1, Matsumoto et al. '475, or Yamamura et al. '571.

All of the above cited references would appear to teach clinker cement compositions that are identical to those claimed by applicants for the instantly claimed invention thus anticipating the instant invention. Even if not anticipated, overlapping ranges of amounts would have been prima facie obvious to one of ordinary skill in the art.
